

V2 Max Plus™ Rehab Reformer* Bundle

Incorporate Pilates into your practice with the value-packed STOTT PILATES® V2 Max Plus Rehab Reformer Bundle.

With a carriage access height of 6 1/2" higher than our Professional Reformer, the V2 Max Rehab Reformer offers easier mounts and dismounts for your mobility-challenged patients.

This one-of-a-kind unit is a powerful combination of our standard Rehab Reformer, a virtual Cadillac and a unique multi-planar biomechanics training tool, utilizing an innovative, adjustable pulley system on the Vertical Frame.

This adjustable pulley system allows for proper movement patterns in all planes of motion while supporting or challenging clients as needed. The angle of resistance can be adjusted to ensure that proper muscle firing patterns are achieved. The adjustable gear system and breakthrough retractable rope system, in conjunction with the adjustable pulleys, allow for precision adaptability for all body types.

This multi-tasking unit provides maximum utility in a minimum amount of space, offering limitless exercise possibilities by facilitating core stability and peripheral mobility exercises through all stages of rehab and beyond.

Bundle includes: V2 Max Plus Rehab Reformer, Maple Roll-Up Pole, Reformer Box, Mat Converter (not shown), Padded Platform Extender, and two DVDs, *Essential Reformer, 2nd Edition* and *V2 Max Plus Programming*.

Product Features

- ▶ High-quality materials and construction, superior stability, proven durability and continuous safety through high-intensity use
- ▶ Wide ranging adjustability accommodates a myriad of clients and physical requirements
- ▶ Increased height offers easier mounts and dismounts for the rehab and mobility-challenged client
- ▶ Ultra rigid rails and patented rolling mechanism provide a whisper-smooth carriage ride
- ▶ Adjustable footbar, spring-tension gearbar and carriage stopping system adjust to regulate range of motion
- ▶ Robust wooden standing platform, footbar and pommel-style shoulder rests support a wide range of body weights
- ▶ Carriage equipped with five Reformer springs (3 x 100% tension, 1 x 50% and 1 x 25%), removable shoulder rests, soft Reformer loops and ropes, secure spring housing system and our patented, retractable rope system
- ▶ Vertical Frame is equipped with all springs, straps and safety chain as shown. Travelling pulley and spring systems provide 28 adjustable positions to vary the angle of resistance
